MODERN WAYS OF ACHIEVEMENT OF SUSTAINABLE ECONOMIC DEVELOPMENT

¹Vinnytsia National Technical University

Abstract: *The article examines the current state of the innovation sphere of Ukraine and proposes measures to promote sustainable development of the national economy*

Key words: innovation activity, innovation process, innovation system, competitiveness.

Today, the classical industrial society with its characteristic features - a developed labor and capital market has been replaced by its post-industrial stage, which is dominated by information, knowledge and other "intangible" values, which become a decisive factor in effective development of enterprises, their competitiveness. production of goods and material services to the dominance of non-productive services. In fact, the world has already exhausted the opportunities for improvement and further progress of old technologies, instead, a phase of active growth of new technologies is developing, capable of making revolutionary changes in the economy and society in general. Under the influence of science there is a transformation of the economic system, intensified scientific, technical and innovative activities.....
